

HTML CSS Prevent Text Selection

Here's a simple css style you can add to your styles.scss of any project, to prevent user selection of text.

```
.prevent-select {  
  -webkit-user-select: none; /* Safari */  
  -ms-user-select: none; /* IE 10 and IE 11 */  
  user-select: none; /* Standard syntax */  
}
```
