

.NET 5 Global Using Error

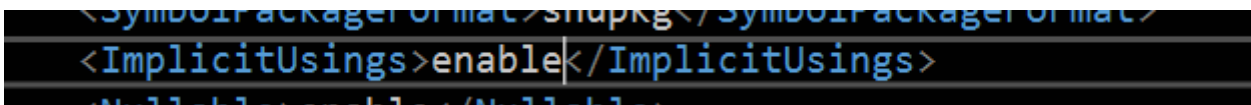

If you have a project that is targeting a .NET 5, and you see the following error, follow this page:

```
BE found
CS8773 Feature 'global using directive' is not available in C# 9.0. Please use language version 10.0 or greater.
CS8773 Feature 'global using directive' is not available in C# 9.0. Please use language version 10.0 or greater.
CS8773 Feature 'global using directive' is not available in C# 9.0. Please use language version 10.0 or greater.
```

The error indicates that your csproj file likely has a statement that only works in .NET6 (C# v10) and later.

Open your csproj file and look for a statement, like this:

```
<SymbolPackageFormat>snupkg</SymbolPackageFormat>
<ImplicitUsings>enable</ImplicitUsings>
<Nullable>enable</Nullable>
```

If set to enable (in a .NET 5 project), that is causing the problem.

Set it to 'disable', and rebuild.
