

Three Start Plants

Small Planet Ley Lines:

Small Planet 3-Star Resource Leylines

Leylines are lines of longitude (Lines that run North/South).
These leylines are valid only between latitudes +45.00 to -45.00 degrees.

From the table below find the closest line of longitude. Follow that line north or south and you will find either curious deposits, metal fingers or sac venom.
 Multiple clusters can be found along the same leyline.

Only one of the three types of 3-Star resources can be found per planet.

To determine planet size walk 100u directly north or south of a waypoint and determine the difference in latitude.
 SMALL=0.09 MEDIUM=0.06 LARGE=0.04
